PROFESSIONAL SUMMARY

Motivated Civil Engineering undergraduate with a 9.25/10 CGPA and experience leading projects in smart infrastructure, IoT, digital platforms, and emerging technologies. Skilled in C, Python, Java, JavaScript, HTML, CSS, and Solid Edge, with GitHub repositories and ongoing learning in Data Structures and Algorithms. Strong interest in applying engineering and technology to practical real-world problems.

EDUCATION

<i>Sri Venkateshwara College of Engineering, Bengaluru</i> BE- Civil Engineering	[2025 - Present]
<i>Vijaya Jyothi Group Of Institutions, Bengaluru</i> 1-12th	[2011-2025]

TECHNICAL SKILLS

Programming | Web Technologies | Engineering Software | Tools & Platforms

Programming: C, Python, Java, JavaScript

Web Technologies: HTML, CSS

Engineering Software: Solid Edge

Data Structures & Algorithms: Currently completing

Tools & Platforms: Git, GitHub, MS Office

GitHub: Currently adding repositories

LeetCode: 10+ problems are solved

CERTIFICATIONS

Internet of Things(IoT) Infosys springboard [Completed foundational training in IoT] Technology that connects physical devices and sensors to collect, exchange, and use data over the internet	[17 Aug-2026]
EY Technology Risk Virtual Job Simulation Forage [Completed a virtual job simulation focused on technology] related risks to help organizations protect systems, data, and business	[02 Sep-2026]
Data Visualisation: Empowering Business with Effective Insights Forage [Completed a virtual experience focused visualization] learned about the buisness analyse data	[16 Aug-26]

PROJECTS

Blood Connect • Digital Blood Coordination Platform Project Lead: Led design of a platform connecting donors, hospitals, blood banks, colleges • Designed proximity-based emergency donor matching, SOS alerts, and proactive blood-shortage prediction.	[August-2026]
CiviLab • Digital Civil Engineering Laboratory Management System Project Lead: Led design of an integrated laboratory workflow • Service Requests, Material Inward, Job Cards, Sample Coding, Test Allocation, and Test Reports management.	[August-2026]
Smart Irrigation System • IoT-Based Water Management Project Lead: Led design of an IoT-based irrigation system using soil-moisture and rain sensors. • Proposed automated irrigation based on soil moisture and rainfall for efficient water management.	[March-2026]
Smart Traffic Management System • Project Lead: Led development of a smart traffic management concept focused on traffic monitoring, congestion reduction • Explored technology-based solutions for improving urban traffic management.	[November 2025-January 2026]
Smart India Hackathon • Team Code Breakers Project Lead: Led the team in developing an AI-Powered Email Threat Detection • GeoLocation and Forensic Intelligence Platform. Explored AI, cybersecurity, geolocation, and forensic intelligence for digital threat detection.	[2026-Present]

ACHIEVEMENTS & VOLUNTEERING

ISEP Program – Selected as 1 of 18 students from 500+ participants through a competitive selection process.
Also volunteered through ISEP at a college-level mock interview program, assisting with event coordination and interview activities.
